

Introduction to Core Java

Duration: 1-2 Days

Overview / History and Importance of Java, Installation & SetUp, JVM, JRE, JDK , Basic Java Syntax ,Java Comments , Java Data Types, Java development Kit

Variables, Operator & User I/O

Duration: 4 Days

Java variables, User Input/Output, Keywords, Identifiers, Constants, Conversion and type Casting, Arithmetic operators, Logical Operators, Logical Operators, Assignment operators, Conditional Operators, Bitwise Operators.

Control Statements

Duration: 7 Days

Introduction, if statement, if-else statement, if-else-if ladder, Switch Statement, While Loop, do-while Loop, for loop statement, Nesting statements, jump, break, continue, return.

Introduction to Class and Methods

Duration: 7 Days

Class fundamentals, Methods, Object, Declarations, New operator , Method Overloading, Recursion, This keyword, Static variables and methods, Nested class, visibility control.

Introduction to OOPs

Duration: 20 Days

Oops, Encapsulation, constructor, types of constructors, constructor overloading, polymorphism, run-time and compile-time polymorphism, inheritance, interfaces, super keyword, final/finally keywords, abstraction.

Packages

Duration: 7 Days

Introductions, Defining packages, Java API packages, Classpath, Creating and implementing Packages, Access Control.

Array , Strings

Duration: 10 Days

Introduction, Array , 2D, 3D array, Strings, String constructor, String Operator, StringBuffer, StringBuilder, Extraction, Comparison, Searching, Example Practice.

Exception And Event Handling

Duration: 7 Days

Introduction, Exception, try-Catch, Multiple try catch, Throw and Throws statement, Event Handling.

Multithreading

Duration: 10 Days

Introduction, Create thread, Multiple thread, Life-Cycle of a thread, Priorities, Exceptions, Synchronization.

File Handling

Duration: 7 Days

Introduction, File creation, Read and Write function, deletion, Example Practices.
